

4-Slot USB/LXI Modular Chassis from Pickering Interfaces

A Compact Solution for a Wide Variety of Switching & Simulation Applications

- Fully LXI Compliant
 - Remote Control via USB3, Ethernet or Optional Wi-Fi
 - Fit One to Four of Pickering's 1000+ PXI modules
 - Compact Half-Rack Width 2U Form Factor
 - Ideal for Portable, Benchtop and Space Restricted Rack Mount Applications
 - 3-Year Warranty
- Application Examples:
 - 400 General Purpose Relays
 - 2208 Cross-point Matrix
 - 792 Channel Multiplexer
 - 72 Programmable Resistors
 - 2 x 32:1 Terminated 600MHz MUX
 - 6 x SP6T 40GHz MUX
 - 128 In/128 Out Digital I/O
 - Or Mix & Match for Your Application

Switching | Simulation | Programmable Resistors | Custom Design | Connectivity & Cables

4-Slot USB/LXI Modular Chassis

Our 4-Slot Chassis is designed to fit alongside half-rack width instrumentation, such as a DMM, and can also be used for portable and benchtop applications. Rubber bumpers are provided to protect the chassis from damage when used on a benchtop.

PXI Module Compatibility

Our 4-Slot chassis supports the following Pickering PXI Modules:

Switching - Most 3U Pickering PXI Switching modules, including (but not limited to) all 2 and 4-slot 3U BRIC matrices, featuring up to 2208 crosspoints.

Simulation - All Pickering PXI Programmable Resistor and Potentiometer modules offering up to 72 channels, RF Attenuators, Digital I/O and other Simulation modules.
