

## Transportation

- **Food transport in refrigerated containers**

Monitoring temperature and humidity of perishable food (mainly fruit and vegetables) in refrigerated containers in ships and road vehicles.

- **Pharmaceuticals**

Monitoring temperature of pharmaceuticals in transit.

- **Photocopier transport and storage**

Logging temperature and humidity of photocopiers in storage warehouses and in transit.

- **Cargo transport in non-refrigerated containers**

Monitoring temperature of non-refrigerated cargo hold to assess the effect on various types of cargo and whether there is adequate ventilation.

- **Works of Art**

Monitoring temperature and humidity of works of art in transit.

- **Blood transport**

Monitoring the temperature in a package of blood during air transport.

- **Transport of spices**

Measuring temperature fluctuations and condensation in shipments of spices from the Far East. Traditionally, spices have been shipped in jute bags. The aim is to assess the feasibility of using metal box containers for transporting bags of spices in bulk.

- **Transport of animals**

Monitoring temperature and humidity during transport of animals.

- **Transport of confectionary**

Monitoring the temperature of consignments of chocolate in transit overseas.
